SUMMARY

I'm a proactive Full-stack developer who can quickly and easily turn your UX/UI files into both mobile and web frontend that loads fast and is responsive across all platforms and then create and integrate the backend APIs to develop a complete web application..

WORK EXPERIENCE

Software Developer : *Binaytara Foundation, Bellevue USA, Remote*

May 2024 - Present

- 1. Learning Management System (Web):** A platform for earning CMA accreditation for doctors and practitioners.
 - **Technologies Used:** ReactJS, Nodejs, Supabase, Redux Toolkit, Material UI, Google Maps, etc.
 - **My Role:** To create backend APIs, create interactive frontend and its integration to the backend apis.
- 2. Organization Website (Web):** Main website of the Binaytara Foundation.
 - **Technologies Used:** React, Nodejs, Strapi CMS, Supabase db, Redux Toolkit, Tailwind Css, etc.
 - **My Role:** To create APIs, Convert design into code, and integrated the APIs with the frontend.
- 3. Oncoblast App (Web):** This is a part of Learning management systems to track the exams, questionnaires, examinees, and the dashboard.
 - **Technologies Used:** React, Nodejs, Supabase db, Redux Toolkit, Tailwind Css, Google Maps, etc.
 - **My Role:** To convert the design to code and create APIs with nodejs and integration of API with frontend.

Software Developer : *Dailo Technologies, Kathmandu, Remote*

August 2023 - May 2024

- 1. Restaurant Management System (Web):** A complete restaurant solution web application accommodating multiple restaurants with dine in, delivery and take away orders in real-time.
 - **Technologies Used:** ReactJS, .Net, MySQL, Redux Toolkit, Material UI, Google Maps, SignalR, Esewa and Khalti payment gateways, etc.
 - **My Role:** To convert the design to code, and debugging in an already built project.
- 2. Restaurant User App (Mobile):** Mobile version of the restaurant web application built especially for end users or customers.
 - **Technologies Used:** React Native, .NET, MySQL, Expo, Redux Toolkit, SignalR, Tailwind Css, Esewa and Khalti payment gateways, etc.
 - **My Role:** To convert the design to code, debugging, and feature implementation of the web version into mobile application of an already existing system.
- 3. Delivery Rider App (Mobile):** This is also a part of restaurant management system developed for the rider to accept and process online delivery orders.
 - **Technologies Used:** React Native, .NET, MySQL, Expo, Redux Toolkit, SignalR, RabbitMQ, Tailwind Css, Google Maps, etc.
 - **My Role:** To convert the design to code and implement real-time order processing by the rider.
- 4. Taxation (Web):** A project for local government to handle the assets registration and tax payments by the public user.
 - **Technologies Used:** ReactJS, .Net, MySQL, Redux Toolkit, Material UI, Esewa, and Khalti payment gateways, etc.
 - **My Role:** To convert the design to code and implement client side implementation of tax portal.
- 5. Kaligandaki Krishi Market App (Mobile):** A project for the local people of Kaligandaki municipality to promote, sell and buy the local vegetables, fruits, meat and cattle.
 - **Technologies Used:** React Native, .Net, MySQL, Expo, Redux Toolkit, Tailwind Css, etc.
 - **My Role:** To convert the design into code and implement features for the users to buy and sell their local productions according to local government's norms.

- 1. Learning Management System (Mobile):** A School Management System application, rich in features including separate modules for group admin, admin, teacher, parent, student and system users.
 - **Technologies Used:** React Native, .Net, MySQL, Expo, Redux Toolkit, SignalR, Tailwind Css, etc.
 - **My Role:** To convert the design to code and feature implementation in different modules.
- 2. Karkhana App (Mobile):** A School Management System application, rich in features including separate modules for group admin, admin, teacher, parent, student and system users.
 - **Technologies Used:** React Native, .Net, MySQL, Expo, Redux Toolkit, SignalR, Tailwind Css, etc.
 - **My Role:** To convert the design to code and feature implementation in different modules.
- 3. Citizen Charter (Web):** A System that presents the documents and graphics that acts to guard the rights of citizens.
 - **Technologies Used:** ReactJs, .Net, MySQL, Expo, Redux Toolkit, SignalR, Tailwind Css, etc.
 - **My Role:** To convert the design to code and integrate APIs for feature implementation.

Freelancing, Remote

October 2023 - February 2024

- 1. Performance Management System (Web):** System for recording and evaluating the performance of the employees of an organization for any given time period.
 - **Technologies Used:** ReactJS, Django, PostgreSQL, Redux Toolkit, Material UI, etc.
 - **My Role:** To convert the design to code, and create dashboard for super Admin, office admin, and employees, and evaluate the performance of the employees based on their activities for any given fiscal year.

Full Stack Developer : Chand Innovation Labs, Remote

March 2022 - August 2023

- 1. Crypto Wallet:** EVM based cross-chain crypto wallet created for Metapolis platform, integrating Zilliqa, Ethereum, Ploygon, and Binance. It was utilized for any transactions within Metaverse.
 - **Technologies Used:** ReactJS, Ethers, Zil, Node.js, Express.js, MongoDB, etc.
 - **My Role:** To write effective APIs and convert design to code in both full screen and extension window. I also worked on page designs and data communication layer between extension and underlying blockchain logic.
- 2. NFT Marketplace:** Marketplace for XRP NFT Tokens. A blockchain NFT marketplace for buying and selling NFT Tokens created for Metaverse NFT Tokens.
 - **Technologies Used:** ReactJS, Redux Query, Ethers, MongoDB, Node.js, Express.js, etc.
 - **My Role:** To write APIs, convert design to code, and integrate the APIs to frontend.
- 3. Launch-Pad:** An application for fundraising on blockchain projects.
 - **Technologies Used:** ReactJS, React Query, etc.
 - **My Role:** I worked to write APIs, converted the design to code and integrated apis on form submissions and participation module.

EDUCATION

Bachelor In Computer Engineering

September 2017 - August 2022

IOE, Purwanchal Campus, Dharan, Sunsari

Intermediate in Science

May 2015 - June 2017

Kailali Multiple Campus, Dhangadhi, Kailali

SKILLS

- **Frontend Tech-Stacks:** ReactJs, NextJs, React Native, Redux Toolkit, Tailwind Css.
- **Backend Tech-Stacks:** NodeJs, Express.js, .NET, SQL, MongoDB, Supabase.
